

MAYANK SAHU

MERN Stack Developer | React.js, Node.js, Express.js, MongoDB

Indore, Madhya Pradesh | +91 93019 09040 | mayanksahu8179@gmail.com | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience across the full stack — React.js and Next.js on the frontend, Node.js and Express.js on the backend, with MongoDB and SQL for data persistence. Built and consumed RESTful APIs in production, reduced Largest Contentful Paint by 18% through frontend optimization, and cut redundant API calls by 40% by re-architecting client-side data flow. Built a reusable, accessible component library on Atomic Design principles that accelerated feature delivery by 20% across a multi-role enterprise product, and implemented Role-Based Access Control (RBAC) end-to-end. Comfortable owning a feature from database schema and API design through to a polished, responsive interface.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Backend: Node.js, Express.js, RESTful API Design

Database: MongoDB, SQL/MySQL

Frontend: React.js, Next.js (App Router), HTML5, CSS3

State & Data Management: TanStack Query (React Query), Redux Toolkit, Context API

Styling & UI Systems: Tailwind CSS, shadcn/ui, Atomic Design

Auth & Access Control: Role-Based Access Control (RBAC), HOC-based Auth Middleware

Tools & Version Control: Git, GitHub, Postman

Deployment: Vercel

PROFESSIONAL EXPERIENCE

React Developer (Intern) — LincPay Solution Pvt. Ltd.

Dec 2025 – Apr 2026

Bhopal, India

- Architected an application-wide performance optimization strategy using React.memo, useMemo, and dynamic imports (code-splitting), reducing Largest Contentful Paint (LCP) by 18% and improving SEO Core Web Vitals.
- Engineered a centralized UI component library in React and TypeScript based on Atomic Design principles, accelerating multi-role feature delivery cycles by 20%.
- Built Psych-Up, a healthcare management platform (React, TypeScript, TanStack Query), architecting a scalable UI ecosystem that enforced design parity across 3+ enterprise modules and cut engineering overhead by 20%.
- Implemented a secure Role-Based Access Control (RBAC) framework using React Higher-Order Components (HOCs), ensuring data isolation across 5 distinct user personas.
- Engineered an optimized data layer with TanStack Query, implementing optimistic state updates and cache invalidation strategies that cut API calls by 40%.

MERN Stack Trainee — J-Spider Training Center

Sep 2024 – Mar 2025

Bengaluru, India

- Built and integrated secure RESTful APIs using Node.js and Express.js, connecting them to mobile-first user interfaces built with asynchronous JavaScript and modular ES6 structures for cross-browser maintainability.

IT Systems Engineer — TCI Express Ltd

Apr 2025 – Nov 2025

Chennai, India

- Maintained 99.9% system uptime while transitioning technical focus toward full-stack development and the MERN stack.

KEY PROJECTS

Vault-Vogue — Premium E-Commerce Application (MERN Stack)

May 2026 – Present

MongoDB, Express.js, React, Node.js, Redux Toolkit, Tailwind CSS | Live: <https://vault-vogue-lite.vercel.app/>

- Independently designed and built the full stack — frontend UI with dynamic product collections and advanced filtering, backend REST APIs, and MongoDB schema design.
- Implemented persistent cart management with Redux Toolkit and optimized asset loading, bundle size, and image delivery for zero layout shifts.
- Owned deployment end-to-end on Vercel.

EDUCATION

Master in Computer Applications (MCA)

2024

Oriental University, Indore | Relevant Coursework: Data Structures & Algorithms, DBMS, Software Engineering

BA in Economics and Mathematics

2022

Zakir Husain Delhi College, Delhi University | Focus: Analytical Problem Solving, Mathematical Modeling, Statistical Analysis

Certification: MERN Full-Stack Development Certificate — J-Spider Development Center (6-Month Intensive Program, 2025)
